

# M6 = 15 days to go!

A and B are two points.

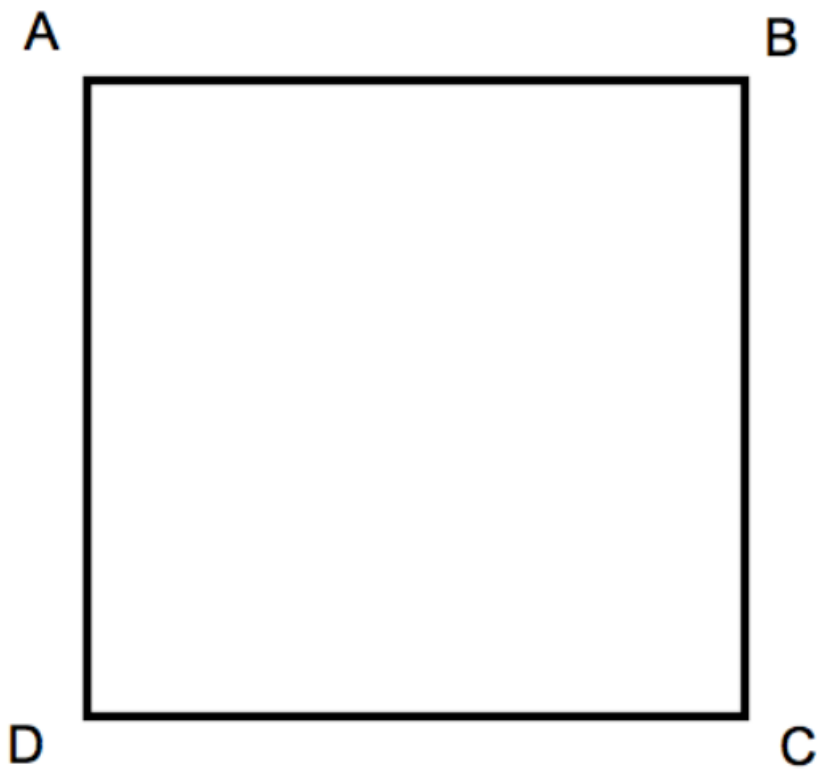

A  
x

B  
x

Shade the region which contains those points which are both closer to A than to B, and less than 5cm from B.

(2)

A and B are two points.

Shade the region inside the rectangle, which is closer to AD than DC, and less than 4cm from D.

(3)
