

M7 = 19 days to go!

A and B are two points.

Shade the region inside the rectangle, which is closer to AD than DC, and less than 4 cm from D.

Remember Loci means distance

Loci of a point

Loci of 2 points

(3)

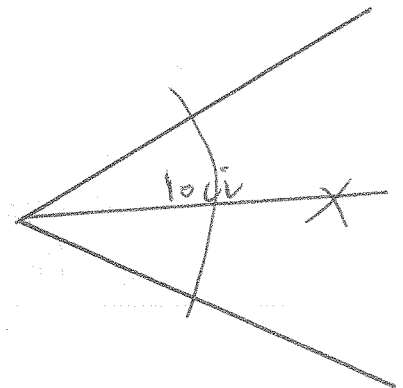

circle around that point

same distance from both points

Loci of 2 lines

angle bisector

2. Natalie has 8 socks in a drawer.

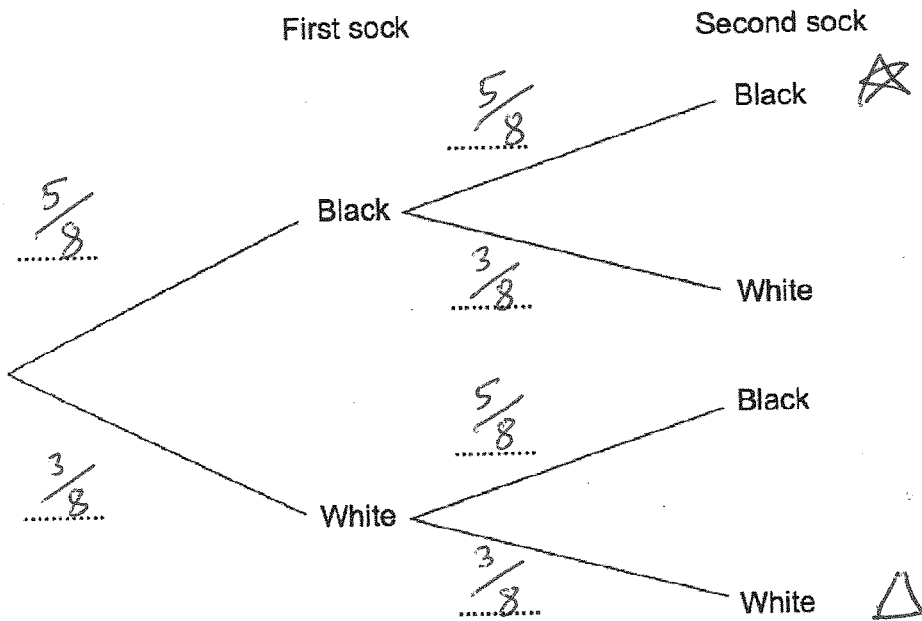

5 of the socks are black.

3 of the socks are white.

Natalie takes out a sock at random, writes down its colour and puts it back into the drawer.

Then Natalie takes out a second sock, at random, and writes down its colour.

(a) Complete the probability tree diagram.

(2)

(b) Work out the probability that the two socks are the same colour.

$$\text{Black \& Black} = \star = \frac{5}{8} \times \frac{5}{8} = \frac{25}{64}$$

$$\text{White \& White} = \triangle = \frac{3}{8} \times \frac{3}{8} = \frac{9}{64}$$

$$\text{Answer} = \frac{34}{64}$$

(2)

Black \& Black AND OR White AND white
